

Brief Profile of

**Adam Kou**

Jiahua (Adam) Kou is a technical expert in the China Academy of Information and Communications Technology (CAICT), serving as the Head of the Healthcare Data Security and Industrial Internet Research in the Cloud Computing and Big Data Research Institute under CAICT. He has participated and managed the development of a number of national policy documents, industry research reports and evaluating systems related to digital health. In addition to leading the work on publishing many group standards, industry standards and international standards related to healthcare informatization, he helped published the whitepaper on the “Industry Internet of the Medical Equipment” for CAICT. He is well established in the healthcare community and has been influencing the development of medical informatization and works on healthcare domain in China.

Mr. Kou also serves as the vice chairman of the Biomedical and Healthcare Task Group of the Alliance of Industrial Internet (AII) in China, responsible for facilitating the collaborations of medical information companies, biomedical manufacturing companies, and medical institutions, and managing the publication activities for the group. He is also an editor of ITU-T standards for SG16, and actively participates in ITU-T standards work related to digital health.

He has been a member of the Healthcare Task Group (HTG) focusing on the Healthcare Framework. In order to better strengthen the working relation between AII and IIC, Mr. Kou is seeking for the Co- chair position of HTG so as to make more direct contributions to the group. He will devote himself to promote international cooperation among members and external organizations in the field of digital health. He will bring in more outstanding Chinese healthcare related companies to IIC to broaden the member base of the healthcare participation in IIC.

Mr. Kou graduated from the Department of Precision Instruments, Tsinghua University, and has in-depth knowledge for research and development in the field of intelligent medical devices. CAICT is the think-tank of the Ministry of Industry Information and Technology (MIIT), China, and AII is a liaison of IIC.
