CONNECT TO IOT EXPERTS TO SOLVE COMPLEX PROBLEMS

Digital technologies are reshaping all industries and many companies are taking steps to reap the benefits of new technologies. This digital transformation will change how organizations make decisions, execute processes and differentiate products and services in the marketplace. To do this, technology users need experts, resources and testing options to develop interoperable and scalable solutions.

The Industrial Internet Consortium offers the Industry Connect Service to assists technology users in developing and deploying projects, as well as identifying industry requirements. The experts within the Industrial Internet Consortium ecosystem have developed best practices, guidelines and frameworks and have applied these resources across many industries, helping technology users solve problems and digitally transform their processes securely. Companies seeking innovative solutions can now work with these experts to solve complex problems, develop new business models and generate new revenue streams.

Visit **www.iiconsortium.org/industry-connect-service.htm** for more.

BENEFITS

- Efficiently Connect Technology Users with Experienced Solution Providers
- Build a Solutions Team
- Identify Requirements and Specifications for Industry Standardization

POTENTIAL SCENARIOS

- A company seeking to solve a large-scale problem requiring more than one solution provider
- A technology vendor seeking a partner or partners to complete an end-to-end IoT solution for their customer
- A company identifying the requirements for a problem or problems, seeking help and definition from IoT experts
- A company seeking to define the requirements and specifications to create new or enhance existing standards.

THE POWER OF THE INDUSTRIAL INTERNET CONSORTIUM ECOSYSTEM

The Industrial Internet Consortium is the largest industrial IoT consortium in the world, comprising leaders in the development and adoption of industrial IoT and enabling technologies. We provide a neutral platform for innovation, enabling growth and entry to new markets, as well as the opportunity to collaborate on projects impacting industry. The Industrial Internet Consortium focuses on real-world solutions, applying emerging and advanced technologies. We assist companies in their digital transformation journey through essential resources and the Industry Connect Service to foster the development of real solutions to complex problems.

Contact us to learn more: **info@iiconsortium.org**

The Industrial Internet Consortium helps technology users, vendors, system integrators and researchers achieve tangible results as they seek to digitally transform across the enterprise. The resources of the Industrial Internet Consortium – developed collaboratively over the years by industry experts from around the globe – give organizations the guidance needed to strategically apply digital technologies and achieve digital transformation.

INDUSTRY LEADERSHIP COUNCILS

Our manufacturing-focused Industry Leadership Council is a collaborative council of senior executives from industry actively implementing, testing or using industrial IoT (IIoT) solutions in their manufacturing facilities. Additional Councils are in the planning stages.

TESTBEDS

A Testbed is an experimentation platform for conducting rigorous, transparent and replicable testing of new concepts, computational tools and new technologies. Our Testbeds offer a neutral platform for testing emerging technologies in a collaborative ecosystem of leading experts.

TEST DRIVES

Test Drives are short-term rapid-engagement pilots for organizations seeking to adopt IoT technologies. Test Drives are poised to stimulate IIoT adoption across industry, utilizing our neutral collaboration platform, fostering accelerated implementation and learning.

IoT CHALLENGES

IoT Challenges are public contests aimed at solving real problems and advancing the validation of IoT applications and solutions. Architects and solution providers compete to design IoT solutions that address high-profile, real-world problems. Prizes for winners can include a funded pilot.
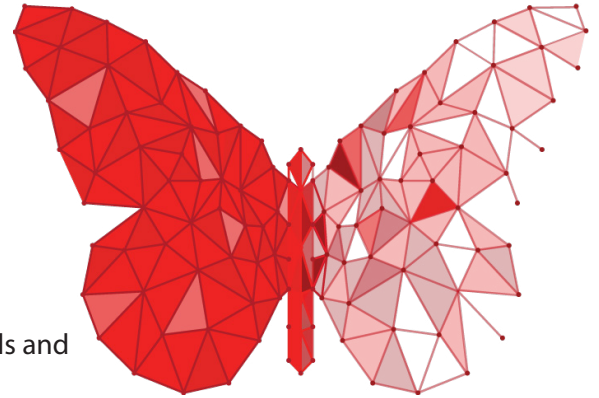

TECHNOLOGY SPECIAL INTEREST GROUPS

A Special Interest Group is a group of members and non-members created for the purpose of collaboration with essential experts in a particular area of technology.

Other offerings of the Consortium include our Resource Hub and its web-based tools, Industry Guidance and Best Practices, Events, Industry Workshops and a Community Forum. These essential resources bridge the gap between today's challenges and digital transformation.

ABOUT INDUSTRIAL INTERNET CONSORTIUM

The Industrial Internet Consortium is the world's leading organization transforming business and society by accelerating the Industrial Internet of Things. Our mission is to deliver a trustworthy IIoT in which the world's systems and devices are securely connected and controlled to deliver transformational outcomes.
